

Acer 7738G Upgrade Guide -- Adding a Second Hardrive

This guide is to give you step by step guide on how to install a second harddrive. I hope you enjoy this guide. If you have any question or need clarification please email me at help@tech-guy.info.

Safety note:

Unplug laptop and remove battery before opening your laptop. Earth yourself off a metal radiator to remove static charge from your body. I do not take any responsibility for damages directly or indirectly by using this guide.

Parts:

The crucial part numbers. Please find below the detailed part numbers which were written on my parts when they arrived. These part number should help you get the exact part you need even if your acer supplier is not knowledgeable on these specific parts.

Second harddrive cover:
The second harddrive cover must be replaced as the stock cover is slightly smaller.

Information written on packaging:
Trans No: TAA165001 leskop
Part No: 42.PCC01.006
HDD.DOOR.2ND
Serial: no: (ACZ) G4-3, (ACG) E10-2

Information written on part:
WIS604CD0900109100801 A01-D1
WKS PN: 60.4CD09.001
OEM PN: 42.PPC01.006

Hardrive Bracket:
The bracket is needed to hold the hardrive inplace securely

Information written on packaging:

Part No: 33.PCC01.004
BRACKET.HDD
Serial: no: (ACZ) E17-3 (ACG) e11-4,
(AIT) 1FSLA1, (AFA) D44-3

Information written on part:
WKS PN: 60.4CD12.001
OEM PN: 33.PCC01.004

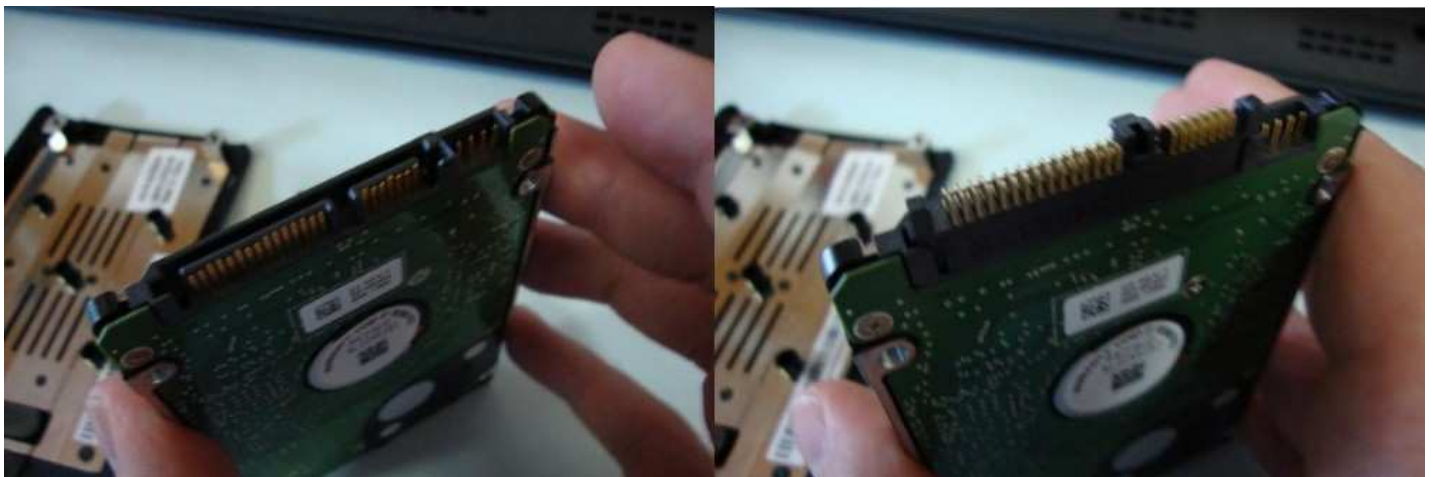

Sata Hardrive Connector:
Information written on packaging:
Trans No: TAA2664477 markli
Part No: 20.PCC01.001
CONNECTOR.HDD.SATA
Serial: no: (AIT) 1FSLA1.(ACZ) E14-3,
(ACG) E11-4

Information written on part:
ALLTOP09371

Step 01:

Take your sata connector and attach it to your new 2.5 inch sata hard drive. Do this by aligning the connector on the hard drive connector and gently push down with even pressure.

Step 02:

Flip the laptop and have a look at the backside. On the bottom left hand corner you will see a compartment with two screws. Remove these two screws and and remove the cover.

**Step 03:**

Place hard drive in bracket and place in the laptop with the bracket facing the laptop. Gently allow the connector on the hard drive slot into the connector on the laptop. Place the new hardrive cover over the hard drive and screw in the two screws to secure the hard drive.

**Conclusion:**

I now have two hard drives installed. I hope this guide helps.
If you find this guide useful please link back to it.
Thanks Daniel
